Re: Consultation on Seasonal Multiplier Factors for Gas Transmission

Dear John,

GNI (UK) welcomes the opportunity to provide feedback on the Utility Regulator's (UR) 'Consultation on Seasonal Multiplier Factors for Gas Transmission'. (9th May 2024)

We note that this consultation relates to the proposed seasonal multiplier factors to be applied to non-annual entry capacity bookings in the postalised tariff from 1 October 2024, and the proposal to maintain the current factors into Gas Year 2024/2025.

We also affirm our understanding that this consultation paper meets requirements within the EU Regulation on establishing a network code on harmonised transmission tariff structures for gas, known as TAR NC.

Given that there is no change to the current factors, and that they remain aligned with the CRU/ROI multipliers, GNI (UK) agrees with the approach outlined in this consultation.

I trust this is in order, however, should you have any queries in this regard please don't hesitate to contact me.

Yours sincerely,

A handwritten signature in black ink, appearing to read 'P.P. Ahern', written over a light blue horizontal line.

Paul Ahern
