Dear Barbara,

Consultation on proposed modifications to gas and electricity Licences

Thank you for providing SGN Natural Gas with the opportunity to comment on the above consultation document.

I can confirm we support the proposed amendments to the gas conveyance licence but in relation to proposed modification 6: to amend the definition of domestic consumer in gas supply and gas conveyance licence, there are additional sections in the SGN Natural Gas licence that also need to be updated.

While the definition of “domestic consumer” is set out in Part 1, Condition 1.1. of our Licence, the definition of “Domestic Premises” is set out in Part 3, Condition 3.1 as is the definition of “Non-Domestic Premises”. For clarity and consistency these sections also need to be amended as proposed on page 25 of the consultation document. In the case of our licence the use of capital letters and lower case also need to be applied consistently throughout the document.

I hope these comments are helpful.

Yours sincerely,

Beverley Grubb
Regulation Manager
